In-House Manufacturing Capabilities

Lean Practices

- Highly experienced / trained personnel
- Cross training over multiple machining and surface treatment disciplines (hard and soft work)
- Dedicated tooling
- Dedicated fixtures
- *Work cells* - process and product specific
- CRS certified programs, process documentation, repeatability and traceability
- Flex shifts

In-house design, engineering & reverse engineering capabilities

In-house machining

- Milling
- Turning
- Multi-tasking / multi-axis
- Shaping
- Hobbing
- Slotting
- Sawing
- Surface grinding / lapping
- OD grinding
- ID grinding
- Light broaching
- Vibratory deburr
- Ergonomic hand deburring tools

Facilities

- Temperature controlled environment (+/- 5 degrees F, year round)
- Lighting - energy efficient
- Insulated building / latest roofing tech

Testing

- Dynamic load
- Fluid power / hydraulic
- Air leakage testing

Quality Control

- Lean processes
- CMM
- Calibrated in-process gauging
